Mountain Guiding Course

Our **Mountain Guiding Course** presents a distillation of the wisdom and experience gained from 100 years of mountaineering in South Africa and elsewhere. Respect for the mountains, both for their challenges and their hazards, can only be learnt by being exposed to them, preferably under the guidance of a competent leader. This course however, provides a valuable adjunct to experience; the novice will be assisted in learning about mountain leadership and how to behave in the mountains; the more experienced mountaineer or hiker will use it to consolidate his or her knowledge, fill in the gaps and learn new skills.

This course is **FREE** and available to you on your **"MY COURSES"** page, once you have registered and logged in.

Delivery and assessment of ONLINE courses

All Course content is available **online** but may also be downloaded in PDF format (and easily printed) so you don't have to be **online** to study. No physical product except certificates earned, are posted to students.

All assessment is delivered entirely **online** and is automated. The assessment which we've called "take the test" (top right in each component) consists of between 10 and 30 true/false and multiple-choice questions. There is one test for each of the components of a course. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**
