LEARN PROTECT SAVE

## Predator Management on Livestock Farms Course

Our **Predator Management on Livestock Farms Course** Originally written for the Landmark Foundation, this course has been revised for the wildlife manager, land owner, wildlife enthusiast and of course, the livestock farmer. This is a most important, useful and practical course for all those who are on either side of the

Predator / Livestock conflict. If you are seeking or merely interested in non-lethal, holistic, ecologically acceptable and ethical management strategies to deal with predator/livestock farming conflicts, then this course is for you.

This course is **FREE** and available to you on your **"MY COURSES"** page once you have registered and logged in.

### Delivery and assessment of ONLINE courses

All Course content is available **online** but may also be downloaded in PDF format (and easily printed) so you don't have to be **online** to study. No physical product except certificates earned, are posted to students.

All assessment is delivered entirely **online** and is automated. The assessment which we've called "take the test" (top right in each component) consists of between 10 and 30 true/false and multiple-choice questions. There is one test for each of the components of a course. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**

## **Module # 1 – Introduction to Predator Management**

**Component # 1** – Introduction to Predator Management on Livestock Farms

**Component # 2** – Understanding Predators and their Impact

## **Module # 2 – Problem Species**
