

Our **Wilderness Navigation Course** is a practical navigation course for all hikers, trampers, mountaineers, orienteering enthusiasts, outdoor leaders, teachers, scouts, guides, adventure racers, rescue teams and anyone else who ventures “Anyplace Wild”. Written by master navigator, Andrew R Friedemann, this may be the most valuable course you will ever study. Navigation is a skill that can be learnt by anyone; developing a proficiency in this ability can save your life and will significantly enhance your experiences when venturing into the outdoors.

### Delivery and assessment of **ONLINE** courses

All Course content is available **online** but may also be downloaded in PDF format (and easily printed) so you don't have to be **online** to study. No physical product except certificates earned, are posted to students.

All assessment is delivered entirely **online** and is automated. The assessment which we've called “take the test” (top right in each component) consists of between 10 and 30 true/false and multiple-choice questions. There is one test for each of the components of a course. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**

## **Module # 1 – Introduction to Wilderness Navigation**

**Component # 1** – Introduction to Navigation Anyplace Wild

## **Module # 2 – Safety in the Wilderness**

**Component # 1** – Safety Management

## **Module # 3 – Direction in the Wilderness**
