Our anti-poaching course is based upon extensive direct counter-poaching experience. It provides a theoretical, detailed background to the prevention of poaching, theft and mutilation of game animals, from a game reserve perspective. We explore what poaching and anti-poaching are and the 3 levels of poaching. We discuss the anti-poaching unit, how to set one up and the two main options to counter poaching: active & passive prevention. Examine poaching methods and the economics of poaching, anti-poaching equipment and the various anti-poaching action plans together with the legalities of anti-poaching.

If you are a reserve owner, conservancy, wildlife or game farm manager; game ranger, game guide, game guard, trails guide, field guide, armed response unit or merely have an interest in this field, this course is for you.

Delivery and assessment of ONLINE courses

All course content is available **online** but may also be downloaded in PDF format (and easily printed) so you don't have to be **online** to study.

All assessment is delivered entirely **online** and is automated. The assessment which we've called "take the test" (top right in each component) consists of between 10 and 30 true/false and multiple-choice questions. There is one test for each of the components of a course. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**
