Astronomy

14 billion years in the making, our Astronomy Course is a must for the dedicated enthusiast, casual stargazer or for anyone who ever looked up at the night sky in wonder or appreciation. Featuring over 750 spectacular images of galaxies, quasars, constellations, planets, moons, comets, meteors, asteroids, space craft and a wide variety of other fascinating objects. This course is the most comprehensive of its kind available, truly unique.

This course is **FREE** and available to you on your **"MY COURSES"** page, once you have registered and logged in.

Module # 1 - Earth & Moon

- Component # 1 - Astronomy & Astrology
- Component # 2 - Earth & Seasons
- Component # 3 - Moon & Tides
- Component # 4 - Constellations & Ecliptic (Zodiac)

- Component # 1 - Stars
- Component # 2 - Clusters
- Component # 3 - Milky Way & Galaxies
- Component # 4 - Quasars & Black Holes
- Component # 5 - The Universe

Module # 4 - Measurement & Equipment

- Component # 1 - Units & Constants
- Component # 2 - Telescopes
- Component # 3 - Space craft
- Component # 4 - Light & the electromagnetic spectrum

Delivery and assessment of ONLINE courses

All course content is available **online** but may also be downloaded in PDF format (and easily printed) so you don't have to be **online** to study.

All assessment is delivered entirely **online** and is automated. The assessment which we've called "take the test" (top right in each component) consists of between 10 and 30 true/false and multiple-choice questions. There is one test for each of the components of a course. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**
