Birding

Course info and getting started

For bird lovers everywhere, our online birding course offers a unique opportunity to learn more about the habits and behaviour of our feathered friends. In this course, you will explore the wonders of the avian world from the comfort of your own home.

By providing detailed information on identification, behaviour, migration patterns, and conservation efforts, this course can help anyone become a knowledgeable birdwatcher.

This course is suitable for anyone who has an interest in nature and wildlife, whether it's a hobby or a career choice. The course has been designed so that even beginners can easily follow along while still providing enough depth for those who are more experienced.

This course is **directly derived from our field guiding/game ranging course**. It **can be taken as a separate course**. **Do not purchase this course** if you already have access to the field guiding/game ranging course.

Course type

The WildlifeCampus courses are online courses. You can download the course content in **PDF format**, so you do not need to be online to study (you will need to be online to take the tests, though).

There is **one test for each component** of a course. Tests are **multiple choice** and **not written tests**. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**

Duration

Average 0-3 months. There are no deadlines; you may complete courses at your own pace.

Certification

Upon completion of the course, you'll receive an industry-recognised digital certificate demonstrating your commitment to upskilling yourself.
