Human - wildlife conflict

Course info and getting started

Our human-wildlife conflict course examines problem animals in the wildlife management context. An animal becomes a problem animal when it competes at an unacceptable level for human resources or becomes a danger to human life. This course explores these conflicts and resolutions.

Course type

The WildlifeCampus courses are online courses. You can download the course content in **PDF format**, so you do not need to be online to study (you will need to be online to take the tests, though).

There is **one test for each component** of a course. Tests are **multiple choice** and **not written tests**. Students may attempt these tests as many times as required until they have achieved the passing mark. **Once a test is passed, it cannot be taken again.**

Duration

Average 0-3 months. There are no deadlines; you may complete courses at your own pace.

Certification

Upon completion of the course, you'll receive an industry-recognised digital certificate demonstrating your commitment to upskilling yourself.
